  - Focused more on functionality and connection of backend servers with decent UI like implementing infinite scroll which increased user retention by 40%.
  - Completed my work with proper documentation and testing within given time.

## PROJECTS

- Healthcare Management System using Hashing with ML Integration** (Django , SQL , ML Algorithms, SHA 256 )
- Used machine learning and hashing technology to offer answers to issues with healthcare data management.
  - Leverage the power of data analysis and machine learning to predict patient conditions, enabling early interventions, personalized treatment plans, and improved patient outcomes..
- Github Link: <https://github.com/Aniket3111/Healthcare-Management-System>
- Food Delivery Management Website** (Node Js , Express , Mongo DB )
- Basic Food Delivery Management Web Application based on CRUD operations with new, update and delete order operations. Mainly designed to get status of Order.
  - Login and New User Authentication with proper encryption.
- Github Link: <https://github.com/Aniket3111/Foodies-Food-Delivery-Website>
- Movies Information Web Application** (React Js , Tmdb Api )
- Developed a web application which fetches data from Tmdb api and shows information about movies like release date, popularity etc .
- Github Link: <https://github.com/Aniket3111/MoviesHut-React->

## SKILLS

Programming Languages : C++ ,Python , SQL , Html/Css, Javascript

Frameworks: React Js, Node Js

Tools: Github , Figma

Other : Front End Development , Data Structures , Object Oriented Programming , DBMS

## CERTIFICATION AND WORKSHOPS

Google Cloud Ready ( Skill Badges in Qwiklabs)

Introduction to Data Science with Python (Coursera)

Attended Web3Camp Workshop by Girlsript Foundation

HackerRank Certified React (Basic) Skills
