EDUCATION

MSc in Software Engineering and Technology

Chalmers University of Technology, Gothenburg, Sweden

Aug 2026 - Present

IPOET Scholarship Recipient

Bachelor of Engineering (Computer Engineering)

Sinhgad College of Engineering, Pune, India (Affiliated to SPPU) | CGPA - 8.64 / 10

2019-2023

WORK EXPERIENCE

Drivers4Me (Software Development Engineer)

Remote (April 2024 - July 2026)

- Contributed to the growth of customer and affiliate platforms, supporting business revenue and operational scale.
- Built scalable admin, B2B, customer, and driver applications using React, TypeScript, Python Flask, and REST APIs.
- Developed backend APIs and a real-time driver allocation system supporting bookings and driver operations.
- Implemented WebSocket-based real-time updates and integrated Google Maps, Mapbox, and Gridlines for live operational dashboards.
- Worked across frontend, backend, databases, AWS, and real-time systems, delivering full-stack solutions in a fast-paced environment.

Abzooba (Trainee)

Remote (July 2023 - Dec 2023)

- Developed responsive and scalable interfaces using React.js and TypeScript, focusing on reusable components and maintainable frontend architecture.
- Collaborated on UI development using Git, JavaScript, and React.js.

Acadque (Frontend Web Developer Internship)

Remote (Nov 2021 - Dec 2021)

- Developed responsive web interfaces using React.js and integrated REST APIs to improve user experience.
- Improved user retention by 40% through UI enhancements and features including infinite scrolling.
- Collaborated on frontend development using Git, JavaScript, and React.js.

PROJECTS

ReelSphere - AI-Powered Movie Discovery Platform [🔗](#) (React, Node.js, Google Gemini, Watchmode API, Vercel)

- Built an AI-powered movie platform supporting natural-language search, recommendations, taste analysis, and conversational movie chat.
- Integrated external APIs for streaming availability, trending titles, and movie data.
- Implemented rate limiting, caching, AI key/model fallbacks, and serverless APIs for reliability and efficient API usage.
- Deployed on Vercel with a modular React frontend and Node.js backend

CloudNest - E Commerce Platform [🔗](#) (React.js, TypeScript, Redux Toolkit, Axios, Stripe, Node.js (API), MongoDB)

- Leveraged JavaScript and React.js to build an advanced e-commerce UI, using type-safe development for better functionality, maintainability, and scalability.
- Utilized Axios for efficient API state management, streamlining data fetching, caching, and synchronization across components.
- Integrated the Stripe checkout flow to enable secure, seamless online payments, improving platform reliability and overall user experience.

Healthcare Management System - ML & Data Security [🔗](#) (Django , SQL , ML Algorithms, SHA 256)

- Developed a healthcare data management system combining machine learning and SHA-256 hashing.
- Applied data analysis and ML algorithms to predict patient conditions using structured healthcare data.
- Implemented data-management functionality using Django and SQL.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Flask

Databases: MongoDB, MySQL

Cloud & Tools: AWS, Docker, Git, GitHub, Bitbucket, Postman, Jira

APIs & Systems: REST APIs, WebSockets

LANGUAGES

English - Fluent

Swedish - A1 (Beginner)
